The original QuikWater® direct-contact water heating system has changed the way industries heat water for use in industrial applications—and our customers couldn’t be happier. That’s because QuikWater’s flagship and twin tower models deliver pure, potable, hot water on demand with 99% energy efficiency, cutting your monthly energy cost virtually in half, and helping your business operate eco-friendly.

- 99% energy efficient, up to 40% energy savings
- Environmentally safe
- 1-2 year ROI compared with boilers or indirect-contact water heating systems
- 9 gpm to 2300 gpm of pure, potable water
- 600,000 btu/hr to 70 mmbtu/hr with temperatures up to 180°F
- Patented clean burn technology
- Non-pressurized design eliminates safety risks
- Runs on natural gas, propane, or No. 2 fuel oil for non-potable water applications
- Integral storage tank with manway
- Easy maintenance with integrated clean-in-place system
- Pre-piped, pre-wired, factory tested
- Low NOx, ultra-low NOx and NSF systems available

QuikWater direct-contact water heating systems are the smart choice for concrete production, commercial laundries, and the glass, textiles, car washing, food processing, government and aviation industries.
Hot. Clean. Green. That’s the QuikWater advantage.

QuikWater® can be set for a range of BTU needs.

Heater Calculations:

Temp Rise x GPM x 500 = BTU Required

Temp Rise = Hot Water Temp – Cold Water Temp

(If temperature rise is less than 50 please consult the factory.)
